LBS Commitment to PRME

Lagos Business School committed to the UN Principles for Responsible Management Education (PRME) on 23rd August, 2011. PRME is a worldwide strategic initiative designed to motivate and champion responsible management education, research and leadership.

We are dedicated to creating and transmitting business and management knowledge relevant to emerging markets. It is also our objective to do so ‘responsibly’ inline with the values of integrity, professionalism, spirit of service, mutual respect and community.

As an institution, LBS commits to implementing the six principles below. We shall also share information on progress regularly to stakeholders as the process moves along.

**Principle 1 | Purpose:**

LBS will develop the capabilities of students to be future generators of sustainable value for business and society at large and to work for an inclusive and sustainable global economy.

**Principle 2 | Values:**

LBS will incorporate into our academic activities and curricula the values of global social responsibility as portrayed in international initiatives such as the United Nations Global Compact.

**Principle 3 | Method:**

LBS will create educational frameworks, materials, processes and environments that enable effective learning experiences for responsible leadership.

**Principle 4 | Research:**

LBS will engage in conceptual and empirical research that advances our understanding about the role, dynamics, and impact of corporations in the creation of sustainable social, environmental and economic value.

**Principle 5 | Partnership:**

LBS will interact with managers of business corporations to extend our knowledge of their challenges in meeting social and environmental responsibilities and to explore jointly effective approaches to meeting these challenges.

**Principle 6 | Dialogue:**

LBS will facilitate and support dialogue and debate among educators, students, business, government, consumers, media, civil society, organisations and other interested groups and stakeholders on critical issues related to global social responsibility and sustainability.
